The Product

Perform is a powerful rapid content authoring system that enables you to develop and deliver personalised courses for your learners, quickly and effectively. Designed to simplify the process of creating your own courses it provides the power and flexibility to customise the learning environment quickly, without any programming skills. Perform provides a user-friendly template-based format with a selection of themes which can be customised with your own corporate identity. In a few quick steps, you can locate a topic of information or choose a new template, add your own text, develop your question formats, add images, audio, video and flash elements and then publish your course. The easy to use features and functionality of Perform provide a unique solution for a wide range of authoring needs.

Perform has been designed to enable you to not only create your own media rich, interactive content but also to offer the benefits of industry standard tracking through a seamless integration with Jenison's CheckPoint Learning Management System. CheckPoint enables you to track and monitor the use and perception of the training as well as printing certificates on completion. Using the unique skill mapping functionality of CheckPoint, it is possible to identify skills gaps and direct learners to the relevant parts of the course to fulfil these needs.

Product Features

- **Selection of themes:** Perform offers a number of themes which can also be customised with your own colours and logos. Within the theme is a frame to enable input of your own content, derived from organisation-specific information, existing training material or purpose built. The frame also adds functionality enabling external links to be included and housing the navigation tools.
 - The first step in using Perform is to select the theme tab. You are then able to select your specific choice of theme or template. This will be the basis for the course design. This template could be changed at a later stage if required
- **Automated module builder:** Enables you to select the layout style you require and add your information text. Layouts can be pre-selected to ease the development process. Options are available for customising providing the author with a range of choices to personalise
- **Question sheets:** Once the template and layout have been selected, a blank question sheet will be displayed to enable you to start building your course. The course content can be developed using the information slide templates to input the detail or import material from an external source. Multimedia interactivity can be added to appeal to all learning styles in the form of audio, video or flash functionality. Complete assessments, tests, quizzes and surveys can be developed providing an assessment mechanism for determining the achievement of learning outcomes.
- **Question types** are available as follows:
 - True/False question
 - Multi-choice question
 - Hot Spot question
 - Matrix question
 - Fill in the blanks questionThese question types are all displayed to the left of the screen as are the access tabs for the following:
 - Static Information Slide
 - Audio Information Slide
 - Video Information Slide
 - Flash Information SlideWithin each question type different styles are available enabling the variation of layout, textual elements and content.

Do you need to build your own management training content?

- Rapid interactive content authoring system to achieve business goals fast and effectively
